Checklist of Assignment #2 on Chapter 1: Introducing Models

Group No.		**Student Name(s)**			
Team No.		**Work Self Assessed by (see Note 2)**		**Work Assessed & Evaluated by**	

	Item	Assessment					Resub.
		Self	Instructor				
		Yes/No	None	Weak	Ok	Good	Yes/No
I- General Report Requirements							
1	Is the work **assembled** in the correct order (Self assessed Checklist, Cover page, Table of contents, **the assignment sheet**, Introduction, Main Body, Conclusion, References, and Appendices)?						
2	Are the **cover page** and **table of contents** well formatted?						
3	Is word processing inside the report having suitable font and size (12-14 pt.) and each page have an informative **Header/Footer** (Assignment#, page#/no. of pages, and team # and members)?						
4	Is there an **INTRODUCTION** at the beginning that provides background, forecast the document and define the problem to orient the reader?						
5	Is the **main body** of the report divided into sections with appropriate titles and subtitles using appropriate font for each **at least** includes the followings?						
	Problem definition (this include the given information and data as well as the requirements and objective of the problem)						
	Assumptions						
	Heuristics						
	Modeling steps and description (**mathematical equations** written clearly with their symbols explained, algorithms, sketches, ..)						
	Model implementation and results (calculations, excel sheet, numbers, graphs, resulted relations. etc),						
	Result discussion and evaluation (interpretations, justifications, comparisons, validation, calibration. etc).						
7	Is there a clear and insightful **Conclusion** after the main body which outlines all important results explained in the report?						
8	Are the **language and style** of the report adequate?						
9	Are **references** used to credit work listed as the last Item of the main report? Do all references appear in a **standard reference list** in the same order as they are referred to in the main body?						
10	Does each **table** or **figure** have a **number** and a **title**, and is it **mentioned** in the text before it is placed?						
II- Spread Sheet and Resulted Graph Requirements							
1	Is the spread sheet divided into three distinct areas: • Information area (**work title, St. names** and **team number),** • **Data** or "**design constants** or **parameters**" area, and • **Calculation** area?						
2	Are **all data and** calculation columns or rows **labeled** and have **units**? Moreover, are cell formatting and suitable number of significant figures been used to improve the appearance and presentation of the model?						
3	Are **cell references** used rather than **numerical values** for "**design constants or parameters**" in the **formulae**?						
4	Was a clear **print out** of the spreadsheet **formulae** included?						
5	Does the graph have a reasonable **size, format** and an appropriate, descriptive **title or caption**? And If there is more than one chart line, is there a **legend**?						
6	Do both **axes** have labeled **divisions and** descriptive **titles** (N.B. not a single letter) which include **units**?						

Item		Assessment					Resub.
		Self	Instructor				
		Yes/No	None	Weak	Ok	Good	Yes/No
III- Specific Requirements of the Assignment							
1	Three useful heuristics found in chapter 1 are listed.						
2	Three lessons you have learned from chapter 1 are mentioned.						
3	Terminologies listed in 1-c of the assignment expectation are well defined.						
4	Is the predictive model required in the external problem established and correct?						
5	Is **random generator** correctly used to estimate the model parameters?						
6	Are results for requirement (I-a) in the external problem complete and correct?						
7	Are the **Robustness** and **Sensitivity** of the results obtained evaluated in a correct manner? (requirement (I-b))						
8	Is the requirement (II-a) in the external problem answered and correct?						
9	Are the **Robustness** and **Sensitivity** of the results obtained evaluated in a correct manner? (requirement (II-b))						
IV- Team Process Requirements and Check "*These items for team assignments only*"							
1	Is there an attached team meeting minutes which includes al least: **Agenda, Discussions, Decisions and recommendations**.						
2	Evaluation of the team members performances (None, week or ok)						

Members Names	Effective attendance	Adherence to tasks and getting conclusions	Quality of the work

V) Exciting Features (you may attach a separate sheet to demonstrate these features if needed)

Instructor Assessment

First Submission Grade:	E	M	NI	NCE	NS		Re-Submission Grade:	M	NI	NCE	NS

E	**Exceeds expectations:**	▪ All requirements should be **existed (No None), AND** ▪ **No Weak's**, and at least **FIVE Good's** (or Exciting Features).
M	**Meets expectations**	▪ All requirements should be **existed (No None), AND** ▪ The number of Weak's should be less than **FOUR**.
NI	**Needs improvement:**	▪ If there are **any None's** up to **FOUR**, **OR** ▪ The number of **Weak's** more than or equal **FOUR**.
NCE	**No credible effort:**	▪ The number of **None's** are **greater than FOUR**.

Note: 1) If the work was assessed as **NI, NCE, or NS** you may improve the work and resubmit it within one week. In this case, the maximum grade will be **M**.
2) If it was found that the self assessment was made without care, self regulation lapse will be given.
